are the keywords for success.

Vibration test chambers

ACS is proud to announce the **new release** of its standard vibration test chambers.

Besides their well-known key features - **remarkable basic configuration, flexibility, easy adaptation to any shaker** - these chambers are now equipped with the new cutting-edge **MyKratos™** control system, which makes it possible to manage, monitor and assist the chamber, anywhere at any time, from mobile and desktop devices using Wi-Fi, Ethernet, or mobile network connections.

This line of chambers comes in both thermostatic (temperature only) and climatic (temperature and humidity) versions.

To make your life easier!

ACS vibration test chambers can be interfaced with many various types of shakers for vertical, horizontal and tri-axial vibrations. They are the easiest solution for combining any kind of shaker with an environmental test chamber, thanks to:

1

A very easy operating system

A worm screw type of lifting system allows the test cabinet to be adapted to the shaker's height. Adjustments can be set from the control panel on the chamber. It is also possible to add horizontal movement as needed. This is especially useful if your shaker allows both vertical and horizontal movement or if you want to use more shakers with the same chamber.

2

Greater flexibility

Different removable floors, for vertical and horizontal vibrations, can adapt the chamber to any existing standard shakers. If the chamber must be used without the shaker in place, a blind floor plug is available.

3

A wide range of standard models

The available volumes in both thermostatic and climatic standard versions are 600, 1200 and 2200 l. Three choices of temperature change rate are available for the -70/+180°C models: 5, 10, or 15°C/min, while 5°C/min is the only available rate for the -40/+180°C models. For all the climatic models the humidity range is from 10% to 95% (in the temperature range of +10/+95°C).

4

Innovative Control System

Industry demands smart solutions for managing and maintaining distributed networks of people, machines, and processes. The ACS solution for the Internet of Things is the **unique-in-the-market MyKratos™ software**, making it possible to manage, monitor and assist a test chamber in any place at any time, from mobile and desktop devices, using any kind of connection (Wi-Fi, Ethernet or mobile networks).

Be strict with your product: **expect the best!**

Vibration, temperature, humidity: the right mix

Environmental Stress Screening (ESS) is a process of exposing a product to stresses such as thermal cycling and vibration in order to force latent defects to manifest themselves. Stress screening ensures that defects, which normally arise during the useful life of a product, are discovered during testing prior to the pre-production phase.

A remarkable basic configuration

Basic Configuration

- **MyKratos™**
- **Inspection window**
multiple-crystal, with double heated transparent film, 450h X 450 mm size
- **Internal lighting**
- **Feet**
- **Lifting system**
for a positioning in height of the chamber continuously and precisely on the shaker
- **Closing**
mechanical, with large handle
- **Thermostat**
max./min. digital thermostat with independent probe
- **Removable floor**
the floor for vertical vibrations has a hole equipped with a plug to permit tests even without the shaker
- **Silicone portholes**
80 mm (left side) and 150 mm diameter (right side) fitted with rubber cap. They allow internal-external electrical, mechanical or hydraulic connections
- **Auxiliary contacts**
(specimens, alarms, run shaker)
- **Interface**
Ethernet port for remote control system connection
- **Water condenser**

Options

- **Additional portholes**
80 and 150 mm, see drawing for available positions
- **Handling port holes**
no. 2 max, 125 mm of diameter, they are positioned on the door under the inspection window, allowing the handling of specimens inside the chamber
- **Set of no. 4 analogic inputs**
4÷20 mA for user's data acquisition (no. 1 set max)
- **Set of no. 4 PT100 inputs** (no. 1 set max)
- **Set of no. 8 auxiliary contacts** (no. 1 set max)
- **No break power unit for PLC**
- **Floor for horizontal vibrations**
with fixed square opening depending on model (no closing plug provided)
- **Compressed air dehumidification**
for continuous tests with low temperature
- **Manual or automatic horizontal movement**
manual or automatic track translation system, to simplify the operations of positioning the chamber on the shaker
- **Specimen switching off in case of chamber alarm**
- **Remote air condenser** (on request)
- **MyKratos™ Multichamber software:** installed in a PC to monitor and control multiple chambers (to be supplied upon request)
- **MyAngel24™**

Supply voltage (Vac)		400V ±10%/50Hz/3 + N + G								

1. For Temperature only version add T to the suffix - 2. t=+4°C/+94°C for continuous test - 3. Measured at 1 m distance in front of the unit in 1,6 m height, free field measurement - 4. According to IEC 60068-3-5 and IEC 60068-3-6 - 5. The performance data refer to +22°C ambient temperature, 400V nominal voltage, without specimen - 6. With water at T +29°C and temperature difference at 5°C (water temperature range +12÷+29°C) - 7. With test cabinet in the highest position.

Vibration test chambers

Customized vibration test chambers

A wide range of solutions are available for any customer requirements. Our company has extensive experience in supplying equipment for applications in such diverse fields as electronics, aerospace, aeronautics, automotive and defence.

Walk in temperature, humidity and vibration test chamber (180 m³)

Vibration chamber (capacity 6000 lt approx.) to simulate combined stress (temperature, humidity, vertical and horizontal vibration) on vehicle devices

| 9

ESS and vertical/horizontal vibration test chamber (two vibration systems) for big dimension specimens

Vibration, temperature humidity and altitude test chamber

Maximum flexibility

Thanks to the collaboration with different shaker manufacturers and to the realization of standard and customized project for first-class clients in every application field, ACS has acquired over the years an extensive experience in chamber-shaker coupling systems.

Without Head Extender

Thermal insulation is ensured thanks to the thermal barrier and two silicon gaskets, one fixed on the thermal barrier and the other around the shaker body

Standard solution with the horizontal configuration floor (optional)

The optional floor is equipped with one silicon gasket fixed under the floor and the thermal barrier.

With Head Extender

Two silicon gaskets fixed on the basis and on the top of the shaker head extender for full temperature range application, $-75^{\circ}\text{C}/+180^{\circ}\text{C}$ (continuous test)

Customized solution with the horizontal configuration floor (optional)

Quotations can be requested for:

- Customized design
- Tray and gasket kit

With Head Expander

Thermal insulation is ensured thanks to the thermal barrier and two silicon gaskets, one fixed on the thermal barrier and the other around the shaker body

Customized solution with special floor

Quotations can be requested for:

- Customized design
- Set of two Kevlar gaskets
- Dry air system with dual function: isolation between gaskets and chamber drying (if any)

mykratos

an intelligent Control System ready for the Future

Thanks to their hyper-connectivity, ACS test chambers can match current and future needs related to the new demands of the Industrial Internet of Things and Industry 4.0 for integrated, interconnected and communicating machines.

Available on the new 10 inch display

Simple to use graphical interface

Clarity, consistency and efficiency of use

Embedded Control Software

MyKratos™ inside, to control monitor and assist the chamber from any device. No additional hardware or software required

Easy remote access and control

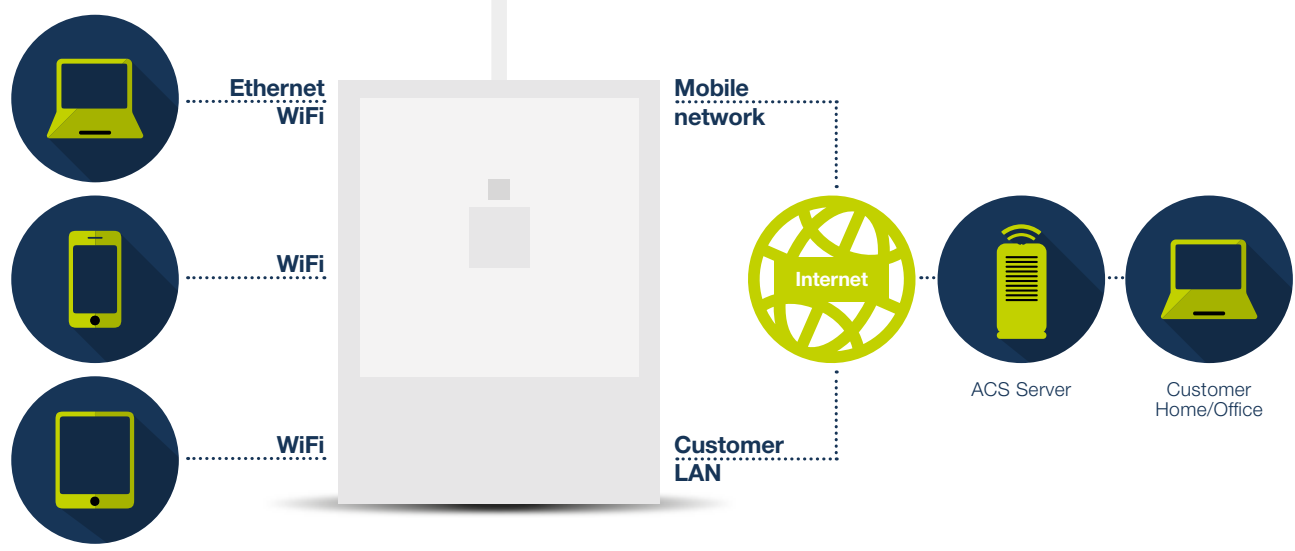

via integrated Wi-Fi / mobile network and Ethernet

Chamber Internal Cloud

for data storage

The interface consists of a powerful software accessible from the 10 inch on board display and from remote devices (PC, tablet, smartphone), **MyKratos™**. The interactive assistance system **MyAngel24™** is optional.

The chamber is equipped with a **PLC** (Programmable Logic Controller) for managing all the chamber's functions and safety interlocks. A special device controls the chamber via mobile devices, such as tablets and smartphones, or establishing a remote Internet connection.

MyKratos™ control system

MyKratos™ control software makes it possible to manage, monitor and assist the chamber anywhere, at any time, in multiple ways (Wi-Fi, Ethernet, mobile network) via mobile and desktop devices.

The chamber wireless (Wi-Fi) connection permits operation using tablets and smartphones (iOS or Android compatible). The operator interface can also be remotely accessed through a chamber connection to the client's LAN or via mobile network (on activation of a SIM card data).

Main features

- Wi-Fi or Ethernet connection to the chamber
- Visualization and graphical analysis of measures and recordings
- Synoptic charts of the entire system
- Multilanguage support
- High configurability of chamber parameters
- Unlimited measures recording possibilities
- Program and Manual chamber operation modes
- Delayed start of a program
- Possibility to select more than one chamber from a single Tablet:
secure access by means of multiple password levels
- Automatic notifications of event and alarms
- Archive manager for easy access to the stored recordings
- Possibility to send email notification
- Possibility to send SMS notification (**MyAngel24™** required)
- Multi-chamber management
- System available in several languages

Additional S/W tools for an Easy Integration of ACS test chambers in Test Labs

Communication drivers for an easy integration into customer-developed Serial or Ethernet based applications, (LabVIEW, LabWindows CVI, Microsoft.NET, Visual Basic 6, etc...) can be supplied on request. The drivers come with a set of examples written in Visual Basic 6, LabView, LabWindows CVI, VB.NET, and permit total interaction with ACS test chambers, for both reading and writing.

Our communication protocol - ModBUS RTU for serial or Fetch/write for Ethernet communication, can be supplied to allow any chamber connection using the customer's own programming languages and operating systems.

Example program LabVIEW User interface

Development environment

MyAngel24™ interactive assistance system

The innovative ACS interactive assistance system **MyAngel24™** operates via mobile network wireless connection, complete with SIM card. This makes it possible to access the operator interface remotely via secure connection and send **SMS notifications**. Cabled connection is also available, via customer's LAN.
N.B.: MyAngel24™ activation on demand.

With **MyAngel24™**, the climatic chambers stay connected to the remote server 24 hours a day, monitoring running conditions in order to guarantee faster and more efficient service and maintenance activities.

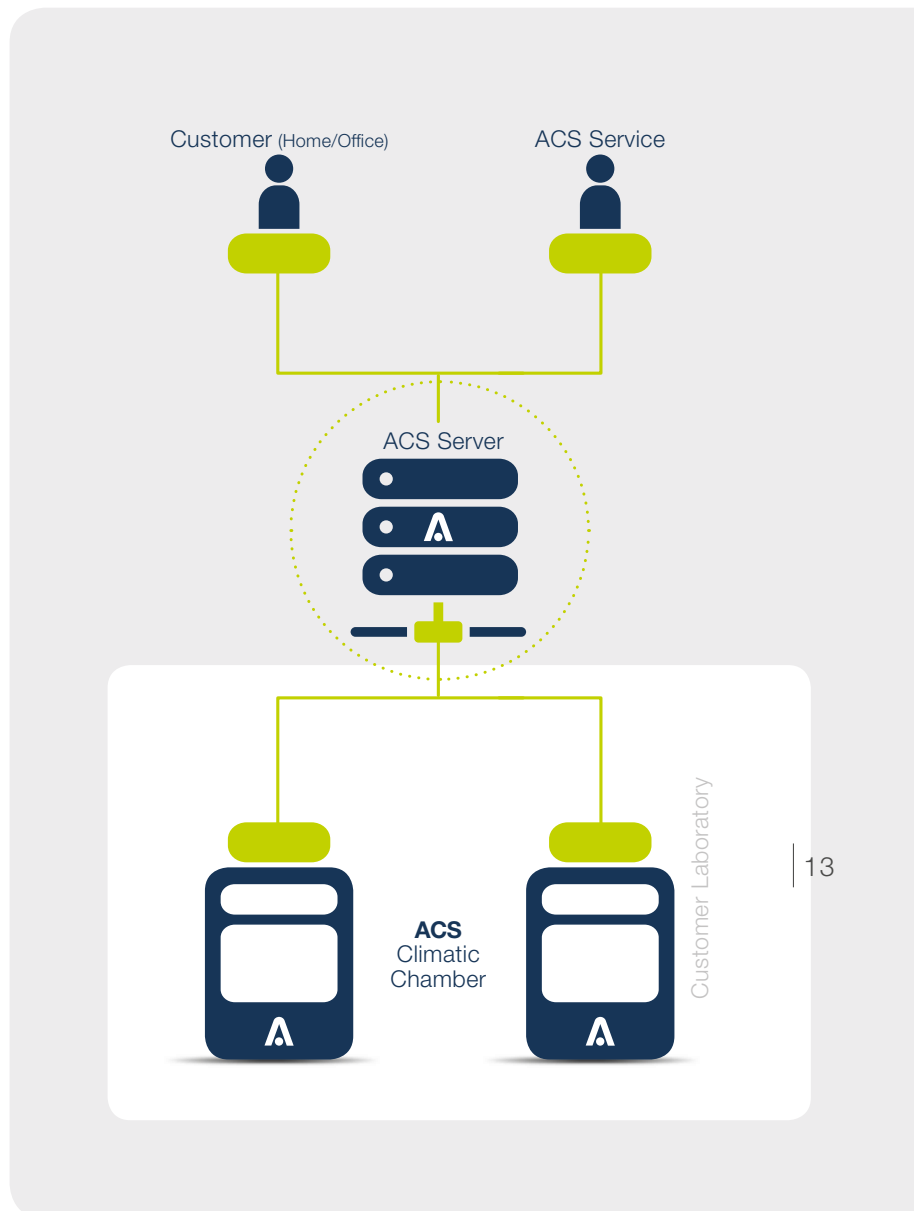

With **MyAngel24™**, you can stay in contact with the climatic chamber whenever you want and wherever you are, accessing its control panel from any web browser.

MyAngel24™ uses the highest security standards available for authentication, secure connection, data encryption and storage. Moreover, you can suspend or limit the data sent to the central server for security reasons during one or more test sessions.

New!

- ✓ Automatic Reporting
- ✓ Self Diagnosis
- ✓ Preventive Maintenance

Maintenance Cost Reduction

• Less on-site intervention

- **MyAngel24™** permits the identification of problems with a remote test and an examination of the recorded data
- ACS can diagnose many problems remotely ensuring the service engineers know how to resolve the problem before visiting site and in some instances avoiding the need for a site visit.

• Reduced chamber downtime

- ACS is able to schedule maintenance to chamber test plan and life cycle monitoring of the main components

• Efficient on site intervention

- Service staff know the problem and which parts may require replacing before attending site

• Remote support

- ACS can adjust PID parameters remotely
- ACS can make changes to PLC programs remotely for chamber optimisation.

Angelantoni Test Technologies, owned by the **Angelantoni Group**, is the only company capable of offering a comprehensive range of environmental test chambers - **ACS** branded - for a great variety of applications, thanks to the expertise and technical know-how of its teams of experts. Innovation, flexibility and organization have always been the keys to success for ACS, world-famous since 1952 also for its high-tech test equipment such as Thermal High Vacuum Chambers for Aerospace applications and Calorimeters.
